OUR PROCESS

Using our three-step process – [Strategy](#), [Content](#), [Design](#) – we develop a plan to tackle your toughest communication challenges and tell your story the way it’s meant to be told.

STRATEGY

We collaborate with our clients to create effective communications strategies that are authentic to their brand. Because no one knows your brand better than you.

We start all of our projects by evaluating the current communications strategy and asking simple questions: What is your communications goal? What are you trying to accomplish? Who are you trying to reach? What would you like them to do? The answers to these questions will inform everything we do.

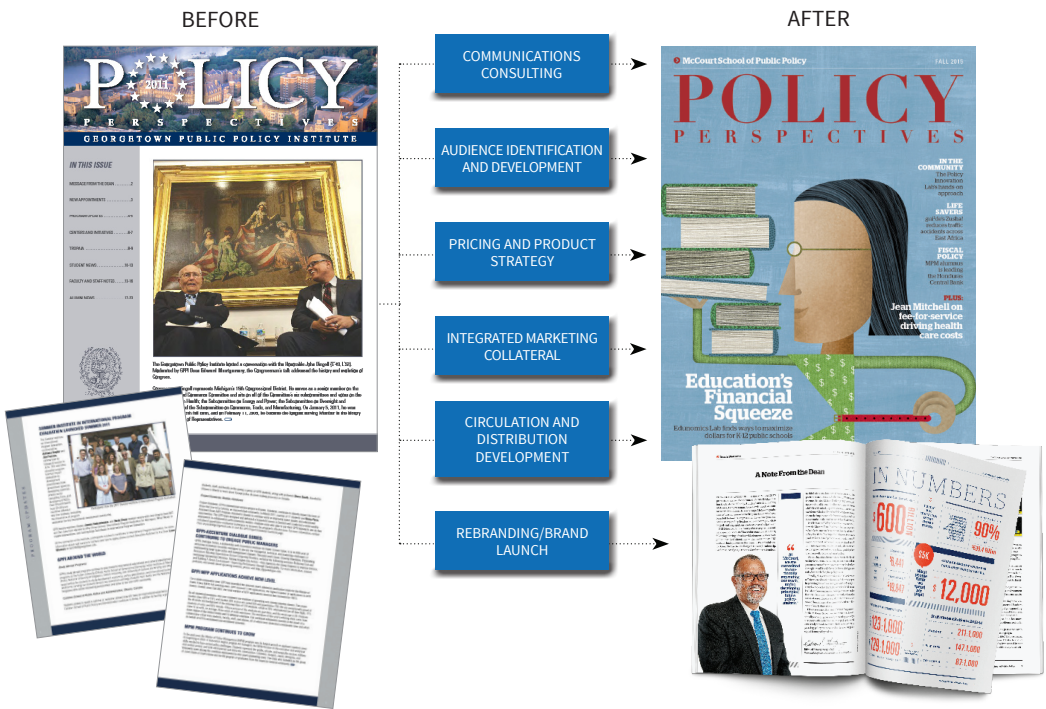

Together we'll work to identify your target audience and develop the best ways to reach them. Strategies might include growing your social media presence, designing a new website, launching or redesigning a publication, or changing the voice and tone of existing products. Whatever it is, our team will hone in on the most effective ways to get in front of each audience segment and target them in a way that reflects your brand's vision.

CONTENT

With your project goals and vision in mind, WCM develops content solutions tailored to impact your target audience.

While no modern brand is complete without a digital presence, print is still the most reliable way to reach certain audience segments. We've been creating award-winning print publications for half a century, and our writers know how to tell a story that resonates effectively and engages readers in print, online and on social media.

Our award-winning editors can adapt existing copy for voice and tone, condense it or expand it, and alter it depending on the platform. Taking an integrated approach to each project, our editorial, design and digital teams work together to amplify your content through social-media efforts, mobile apps, e-newsletters and on the web.

Developing thought leadership with bold, content-rich products adds authority to your brand, connecting readers to your name and telling your story the way it's meant to be told.
